PRESENTATION

Let's Go...in English! K is an activity book intended to provide kids between 5 and 6 years old a variety of opportunities to build communicative abilities in English as a second or foreign language through an academic and fun perspective.

In general, the activities follow a communicative approach in a topic-based curriculum. Familiar and traditional topics such as family, school, animals, food, Christmas, among others, are included in this workbook.

Let's Go...in English! K contains a collection of tasks that bear in mind the developmental stage kids are going through, specifically in relation to their fine-motor skills and perceptual development. In this way, the activities support children with key elements considering not only their second language needs, but also, their human and social development.

The directions are simple and easy to follow, and most important, they give freedom for the teacher to adjust them as needed. With the teacher's instruction and parents' support we are confident kids will go up and up in their skills and learning.

So, let's all go to the world and words in English!
